

FILAMP90 ECO PLUS

STAIN PROTECTOR
HYDROCARBON SOLVENT FREE

- POLISHED PORCELAIN TILE
- MARBLE
- GRANITE
- NATURAL STONE

WHAT IT'S FOR

- Natural finish stainproofing agent.
- **FILAMP90 ECO PLUS** is the best eco-friendly protection against staining for porcelain tile, natural stone, marble and granite with polished, patinaed, brushed and matte honed finishes.
- Reduces absorption without affecting the material's natural look.
- Impregnates, protects, and makes cleaning easier.
- It is also ideal for grouting joints, crackle effect tiles, terrazzo, marble resin and stone slabs.

ADVANTAGES

- Contributes to **Leed® credits**.
- Hydrocarbon solvent free: eco-friendly product
- Since it is water based, it is suited to situations of residual humidity and can thus be applied 24-48 hours after the initial wash, greatly speeding up the process.
- Single-coat application: apply and rub in gently until completely absorbed
- No filming, no yellowing
- It is ideally suited for use on tables, kitchen tops and bathrooms. The product is certified **foodsaf**e.
- **The surface can be walked on after just 4 hours.**

HOW TO USE IT

No dilution: ready for use
Application

- For natural stone with a matte honed finish: apply **FILA MP90 ECO PLUS** to the dry, clean surface with a brush or cloth and allow to soak in; remove any excess, unabsorbed product with a cloth or kitchen paper.
- For natural stone with a polished honed finish: apply an even coat of **FILA MP90 ECO PLUS** to the dry clean surface with a brush or cloth. Leave for 10 minutes, and then use a cloth or kitchen paper soaked in the product to make sure the application is uniform and remove any unabsorbed excess. Rub it gently in to ensure it penetrates and remove any excess.
- For polished porcelain tile and dense polished marble: remove the excess after 4 hours in the same way as for polished materials.

The expert's recommendation: for proper daily maintenance, clean the treated surface with **FILACLEANER** concentrated neutral detergent, at the dilution specified on the label, or **FILAREFRESH** for kitchen tops, window sills and tables.

Caution:
Before applying to the entire surface, test the product on a small area to check for colour changes.
Do not apply the product if you expect it to rain.

COVERAGE

One litre of product covers:	
Polished porcelain tile	30-40 m ²
Honed marble/granite	30 m ²
Venetian paving	20 m ²
Matte honed stone	10-20 m ²

Coverage shown is for guidance purposes only and refers to single coats

Packages

- 250 litre cans: 12 pc carton.
- 1 litre can: 6 pc carton.
- 5 litre can: 4 pc carton.

WARNINGS

- Keep out of the reach of children.
- Do not dump into the environment after use.
- Outdoors flooring must be properly installed before treatment and satisfy the requirements of the situation in question, including: slopes, expansion joints, isolation from the underlying ground, compatibility with sub-zero temperatures.
- Make sure the area is well ventilated during application, this helps the product to dry properly.
- The product does not protect marble or chalky stone against acids.

TEMPERATURES

Storage temperatures: from 5° to 30° C
The product should be applied to materials with temperatures between 10° and 30° C.

COMPOSITION

Water suspension of organic resins

LABELLING

No safety or risk labelling or instructions are required, the product is not classified as hazardous under current regulations.

TECHNICAL FEATURES

Appearance: transparent fluid
Colour: slightly opalescent
Odour: characteristic
Density: 1.004 kg/l
pH: 9.9
